About Amazon

- **Founded:** 1994 by Jeff Bezos, headquartered in Seattle, USA.
- **Business Model:** World's largest **e-commerce platform**, also a leader in **cloud computing (AWS)**, digital streaming, and AI.
- **Products & Services:** Online marketplace, Amazon Prime, Kindle, Alexa, AWS, logistics & supply chain solutions.
- **Global Reach:** Operates in 200+ countries, with millions of sellers and customers worldwide.
- **Vision:** "To be Earth's most customer-centric company."
- **Strengths:** Wide product variety, strong customer trust, fast delivery, advanced technology, and data-driven business strategies.

Objectives Of This Project

To analyze Amazon's e-commerce sales dataset using SQL queries, focusing on **product pricing, discounts, ratings, customer reviews, and categories**. The goal is to extract meaningful insights such as:

- Identifying low-cost and high-discounted products.
- Finding premium high-rated products.
- Analyzing customer reviews for trends and keywords.
- Comparing actual vs discounted prices.
- Highlighting sales patterns within specific categories (e.g., Accessories, Cables).

PROJECT GOALS

1. List all products with a discounted price below ₹500.
2. Find products with a discount percentage of 50% or more.
3. Retrieve all products where the name contains the word "Cable."
4. Display the difference between the average of the actual price and the discounted price for each product.
5. Query reviews that mention "fast charging" in their content.
6. Identify products with a discount percentage between 20% and 40%.
7. Find products that have an actual price above ₹1,000 and are rated 4 stars or above.
8. Find products where the discounted price ends with a 9
9. Display review contents that contains words like worst, waste, poor, or not good.
10. List all products where the category includes "Accessories."

1. List all products with a discounted price below ₹500.

SUMMARY

This project focuses on analyzing **Amazon's e-commerce sales data** using SQL queries. The goal is to extract meaningful insights from product, pricing, and customer review data. Key tasks include:

- Identifying products based on discount criteria (e.g., below ₹500, 50%+ discounts, 20-40% range).
- Filtering products by keywords (e.g., “Cable”) and categories (e.g., “Accessories”).
- Comparing actual vs. discounted prices to calculate price differences.
- Analyzing customer reviews mentioning specific terms like “fast charging.”
- Finding high-value products (above ₹1,000 with 4+ star ratings).
- Reviewing sales patterns such as products with prices ending in 9 or poor review words (waste, bad, not good).

This project highlights how **SQL can be used for data cleaning, filtering, and deriving insights** to support e-commerce decision-making.

KEY INSIGHTS

- 1. Discount Patterns:** Many products with high discounts (50% or more) are driving sales, showing the importance of promotions.
- 2. Affordable Products:** A large share of products under ₹500 attract more customers, indicating strong demand for budget-friendly items.
- 3. High-Value Segment:** Products priced above ₹1,000 with 4+ ratings highlight that customers are willing to pay more for quality.
- 4. Customer Reviews:** Frequent mentions of terms like “*fast charging*” and “*waste/poor quality*” show what features matter most to buyers.
- 5. Pricing Strategy:** Several items have discounted prices ending in “9,” reflecting a common retail pricing tactic to influence purchase behavior.
- 6. Category Insights:** Accessories and cables are frequently searched/purchased, showing their consistent demand.

RECOMMENDATIONS

- **Boost Discounts Strategically:** Continue offering discounts above 50% on selected products to attract more buyers, but balance to protect profit margins.
- **Focus on Budget-Friendly Items:** Strengthen the under ₹500 product segment since it drives high customer interest.
- **Highlight Premium Products:** Promote high-rated items above ₹1,000 as premium quality products to capture higher-value customers.
- **Leverage Customer Reviews:** Use feedback keywords (*fast charging, waste, poor quality*) to improve product descriptions and quality checks.
- **Use Psychological Pricing:** Maintain the “ending in 9” strategy for discounted prices to enhance perceived affordability.
- **Expand Popular Categories:** Increase variety and stock in *Accessories* and *Cables* since these show steady demand.

THANKU SO MUCH
